

Urban services : organisation, financing, pricing, management

Targeted audience

Managers of urban services and utilities at a national or local level.
Political, technical and administrative decision-makers.

Objectives

This seminar, by presenting the experiences and activities in France and European countries, will allow the trainees to be able to :
Identify and compare the main organisation models,
Define the technical and financial resources to be optimised,
Analyse the management system,
Evaluate the challenges and possible evolutions.
