

Management and road operation

Traffic engineering

International seminar

Targeted audience

Managers from

- local authorities in charge of traffic management, road operation and infrastructure management,
- industrial sectors connected with developing road information,
- public and private specialised engineering and design departments,
- motorway companies,
- national authorities in charge of road information.

Objectives

To organise the collection and the exploitation of necessary data.

To know and use useful methodologies.

To choose and implement relevant traffic models.

To know relevant tools (crossroad traffic light, variable message sign, CIR...), in order to favour their implementation and the help decision making.

To organise road user information development and exchanges with all stakeholders.
